SWISSPEARL

Situated in an elevated position in the heart of campus, the Bellevue Student Success Center (SSC) is a gateway for visitors coming in through the main campus entrance.

The center's layout pictures a student's "ascent" through his academic career. Entry services are located on the first floor, student support services on the second floor, and spaces focused on celebrating the students' success are located on the top floor.

The exterior reflects the programmatic organization within the building, with the most active uses visible through a glazed facade. Facades of more inward looking areas have been clad in sand-colored yellow and beige Swisspearl panels. Through the selection of two similar color tones from the Swisspearl Largo Carat series, a dynamic effect.
