Location	Zagreb, Croatia
Photographer	Ivan Balija, Zagreb, Slovenia
Type of Building	Residential

SWISSPEARL

A slightly shiny surface and its metallic character are the unmistakable trademarks of the Swisspearl Reflex facade panels. The fact that the building envelope nevertheless does not appear overloaded, but scores with a discreet understatement, is demonstrated by the Shiny House, which is located in Zagreb.

The single-family house, which stands on a slight hill, was realized with a white color and radiates a simple elegance and timeless beauty.
