SWISSPEARL

Because it serves as the main entrance to the entire Hungarian SAP operation, the Lobby was an important part of the concept. The architects –Vikár&Lukács Architects – created a strong statement with the structure of the space. Our aim was to use interior design elements that respect the space yet gently forms it. In accordance with their Brand Guidelines, the background of the SAP logo can only be white. Besides using white color, we wanted to use some very different, special surface and innovative technology. That is how we came to the choice of using Swisspearl panels. When we created the first renders and elevations, we realized perforation could add more energy to this concept. Our graphic designer worked out several layouts and we feel one of them works with the space and the logo perfectly.
