Photographer	Meraner & Hauser OHG/SNC, Bozen, Italy
Type of Building	Medical

SWISSPEARL

laN+ has clearly demarcated the new reception area with their unusual, curved design and woven exterior surfaces clad with coloured panels of Swisspearl fibre-reinforced concrete and glass. The entire three-story volume is bathed in light that filters through the curtain of glass imbued with blue and green tones, echoing the ocean, which the building is situated alongside of. When the sunshine reflects off the cladding, the faceted facade shimmers like the scales of a fish and when the building lights up at night, it resembles the watery colours of an aquarium.
