Facade	Swisspearl Patina Original NXT P 070
Location	Aalborg, Denmark
Photographer	Clienti a|s, Aalborg, Denmark
Type of Building	Office

SWISSPEARL

The modern office building Visionshuset stands out with its sleek, minimalist aesthetic and innovative use of sustainable elements. The architects have cleverly integrated large windows and open spaces to make optimal use of natural light and create a bright, welcoming atmosphere. For the exterior, a harmonious mix of glass, steel, concrete, and grey Patina Original fiber cement panels was chosen, giving the building a contemporary and refined appearance. These materials not only enhance the visual appeal of the building but also ensure long-term durability. Visionshuset is a prime example of how architectural design and material selection can come together in a modern and visually appealing office building that aligns with sustainable principles. Thanks to this sustainable approach, Visionshuset has been awarded a DGNB Silver certification.

Please note that this Reference project features Patina products. However, since the colour range for Patina NXT is the same, this reference also provides a general impression of the look and feel of a Patina NXT project.
