Temporary Energy Price Surcharge Announcement

Dear Client,

We want to inform you about necessary steps we need to take. It will come as no surprise that the situation in the Middle East is unfortunately also having a significant impact on us. An impact that is considerably affecting our cost structure. You will understand that we cannot continue to absorb these additional and quite extraordinary cost increases ourselves.

The following cost increases are affecting our entire supply chain, in particular:

- Oil-based raw materials: ongoing increases in the cost of petroleum-derived inputs.
- Energy-intensive production of raw materials: higher electricity and gas costs incurred by our upstream suppliers.
- Swisspearl's energy impact: rising energy expenses required to manufacture and process Swisspearl products.
- General fuel surcharge: higher transportation and logistics costs affecting deliveries.

To continue supplying Swisspearl products with the quality and reliability you expect, we introduce an emergency energy surcharge of +3,5% on all our products. This surcharge will apply to orders of finished goods as well as accessories with effect from May 1st 2026.

The 3,5% emergency energy surcharge will be shown separately on our invoices. Existing quotations and orders will not be affected if the order date is prior to May 1st 2026.

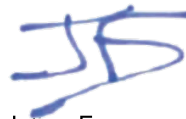

We appreciate your understanding and sincerely hope that a satisfactory solution to this extremely distressing situation in the Middle East will be found soon. As the situation evolves, we will adjust our pricing strategy accordingly and communicate any updates. We look forward to continuing our good partnership. If you have any questions, please contact your Swisspearl Sales Representative.

Kind regards,

Swisspearl Group
