Precast fibre cement products

Swisspearl Group AG

DECLARATION FROM KIWA

This product certificate has been issued on the basis of BRL 5071 "Precast fibre cement products" dated 16 April 2015 in accordance with the Kiwa Regulations for Certification.

The quality system and product characteristics are periodically inspected by Kiwa. On this basis Kiwa declares that there is a justified confidence that the product supplied by the certificate holder complies, upon delivery, with the environmental hygiene specifications laid down in this product certificate, provided that the product bears the NL BSB® mark in a manner as indicated in this product certificate.

Kiwa declares that this product certificate does not include verification of the use in construction works, nor of any notification and/or information obligations of the user towards the competent authority.

For the Soil Quality Decree, this certificate is recognised by the Minister of Infrastructure and Water Management, provided that the certificate is included in the "Digital Counter" on the website of Rijkswaterstaat: <https://loket.rijkswaterstaat.nl>.

Wim van Loon
Managing Director Nederland

Advice: consult www.kiwa.com to verify if this product certificate is valid.

Precast fibre cement products

1. ENVIRONMENTAL HYGIENE SPECIFICATION

1.1 Subject matter and scope

This product certificate relates to the products manufactured and supplied by Swisspearl Holding Danmark A/S - Oostenrijk and its associated environmental hygiene characteristics. The product can be applied in or on the land bed and/or in a surface water body.

1.2 Markings

The delivery note accompanying the certified product shall bear the NL-BSB logo or word mark together with the certificate number.

NL BSB® -logo

NL BSB® -word mark:

NL BSB®

K-0230401

Where reasonably possible, the NL-BSB® mark and the certificate number shall also be affixed to the product or its packaging.

The delivery note shall also contain the following mandatory information:

- certificate number;
- name and address of the certificate holder;
- name and address of the first purchaser;
- production location;
- product designation and grading;
- quantity supplied;
- project location and delivery date;
- class: shaped construction material;
- application: civil engineering works.

1.3 Composition and emission

The average composition values determined in accordance with AP 04-SB and the average emission values determined in accordance with AP 04-U for the product type comply with the maximum values specified in Annex A of the Soil Quality Regulation for a shaped construction material.

2. CONDITIONS FOR USE

The following conditions apply to the use of the product:

- the product shall be used as indicated on the delivery note and the recognised quality declaration and/or Soil Quality Environmental Declaration;
- the product shall be used in accordance with the Environment and Planning Activities Decree (Besluit activiteiten leefomgeving), Article 2.11 (specific duty of care) and Section 4.123 (Application of Construction Materials), including the general requirements, functionality requirements and notification obligations.

3. RECOMMENDATIONS FOR THE USER

Upon delivery, verify that:

- the product is accompanied by a delivery note containing all information referred to above;
- the batch is accompanied by a recognised quality declaration stating any application restrictions and/or the presence of non-standardised substances and parameters;
- the product details stated on the delivery note correspond to the ordered product;
- the product and/or delivery note are marked as indicated in this product certificate;
- the product shows no visible defects, possibly resulting from transportation.

If based on the above, the product is rejected, please contact:

- Swisspearl Group AG
- and where necessary:
- Kiwa Nederland B.V.

Precast fibre cement products

Provide the evidence document (recognised quality declaration and delivery note) to the client. This does not apply where construction materials are supplied to natural persons acting outside their professional or business activities and where the total quantity used in the works does not exceed 25 m³.

4. RECOMMENDATIONS FOR THE CLIENT

The client shall retain the evidence document (recognised quality declaration and delivery note) for at least five years and make it available for inspection by the competent authority.
