**SWISSPEARL**

This public preschool in Sweden is an excellent example of the versatility of Swisspearl panels. The elevation of the building facing the public entry is a light, steel framework clad in perforated white Swisspearl panels assembled vertically with generous openings from the upper balconies to overlook the garden playground, while the main body of the building has been clad in distinctive vertical stripes of Swisspearl panels in white, and light and dark gray. Emerald green window frames brighten the color palette, which is an appropriately lighthearted touch for the preschool.
